Pristina, 25 November 2016

PRESS RELEASE

XIIth Meeting of ERO Board

ERO Board has decided to undertake temporary measures to prevent power outages for the purpose of planned maintenance by Distribution System Operator (KEDS), and decided to investigate thoroughly with respect to initial findings.

The Board of Energy Regulatory Office (ERO) has reviewed the findings from the verification of planned power outages by KEDS. The initial verification of irregularities presented by the commission of ERO has established a sufficient basis for ERO Board to react towards the whole process of planned maintenance. With respect to this, ERO Board has temporarily prohibited power outages for the purpose of maintenance, planned by Distribution System Operator (KEDS), except for necessary maintenance which would risk the safety of electricity supply.

Also, in this session, ERO Board decided on the issuance of three (3) Preliminary Authorizations for construction of new energetic capacities from renewable energy sources (wind), with a total capacity of 105 MW. These projects are planned to be constructed in the cadastral area Selac, in Municipality of Mitrovica, from "SOWI KOSOVO" LLC. company.
