

Prishtina, 12 July 2018
ERO Code: V_1015_20218

The Board of the Energy Regulatory Office,

Based on:

- Provisions of Articles 15 and 16 of the Law on the Energy Regulator,
- Provisions of Article 16 of the Law on Electricity,
- Provisions of Article 11 of the Transmission System Operator License,
- Grid Code - Connection Code, and
- Request from KOSTT JSC dated 05.04.2018 for the review and approval of the amendments in the document "Transmission Connection Charging Methodology"

in the session held on 12.07.2018 issued this:

DECISION

- I. Approving** the amendments to KOSTT's "**Transmission Connection Charging Methodology**" Document

Reasoning

- The Energy Regulatory Office (ERO), on 05.04.2018 has received KOSTT's request for the amendment of the Transmission Connection Charging Methodology. The document provides adaptation of legal and regulatory provisions in accordance with the circumstances and experience in specific connection issues. The most significant amendments have been made to the definition of the connection point given the complexity of the calculation of nominations and obligations of system users having a common connection point. In addition, some amendments-supplements to the responsibilities between the applicant and KOSTT have been made, and a service fee has been defined for the maintenance of the assets invested by the connection applicants, including compensation from the inclusion of new applicants. There have also been some amendments in the costs of equipment and services as well as technical and linguistic improvements.

- ERO has provided comments on the amendments to the Transmission Connection Charging Methodology and has held meetings with KOSTT to contribute to the preparation of the document.
 - Following the inclusion of ERO's comments, KOSTT has again submitted the final document for approval to ERO, and after analyzes made at ERO, some amendments have been made to some points of the document.
 - Finally, after the assessment of the document, the Board of ERO approved the amendment of the Transmission Connection Charging Methodology.
 - All other provisions of the Transmission Connection Charging Methodology shall remain in force.
- II. The decision shall be issued and published in the official languages of the Republic of Kosovo.
- III. The decision shall enter into force on the date of approval by the Board of ERO and it will be published in the official ERO website, where the document will be published. The document will also be published in KOSTT's official website.

Legal advice: The party dissatisfied with this decision may address the Competent Court within thirty (30) days from the date of receipt of the Decision or the date of its publication on ERO's website, whichever occurs last.

Annex: **Transmission Connection Charging Methodology** amended.

ERO Board:

Arsim Janova, Acting Chairman

Besim Sejfijaj, Member

Selman Hoti, Member

Izet Rushiti, Member
