## Announcement

### PUBLIC CONSULTATION

#### **Annual adjustments for Maximum Allowed Revenues for electricity regulated operators (TSO/MO, DSO and USS)**

The Energy Regulatory Office notifies all interested parties that it has published for public consultation the Regular Annual Adjustments Reports for Maximum Allowed Revenues (MAR) to be recovered by regulated electricity companies. In these consultative reports, ERO has made public the initial proposal for updated MARs for the Transmission System and Market Operator (TSO/MO-KOSTT), the Distribution System Operator (DSO-KEDS) and will determine the revenues of Universal Service Supplier (USS). This initial evaluation is based on the proposals submitted by regulated companies as well as the decisions on Maximum Allowed Revenues for the regulatory period 2018-2022 for the TSO/MO and the DSO.

The adjustment process for the relevant tariff year 2021 includes the period 1 April 2021 - 31 March 2022, but due to the lack of the required quorum for the functioning of ERO Board, this process has been postponed and the delay in making decisions on Maximum Allowed Revenues and tariffs for this relevant tariff year, will be updated in the next tariff year 2022.

The determination of Maximum Allowed Revenues - MAR is a price adjustment process used by ERO so that regulated companies can collect the revenues required for provision of regulated services.

ERO invites all interested stakeholders to contribute to this process, by reviewing and commenting on the data and views presented in this Consultation Report, which will result in an accurate estimation of Maximum Allowed Revenues for the Distribution System Operator (DSO/KEDS).

The interested parties who want to comment on ERO proposals can submit their comments in writing at [ero.pricing-tariffs@ero-ks.org](mailto:ero.pricing-tariffs@ero-ks.org) no later than 07 September 2021. The comments can also be sent by mail at:
